

An engineering drawing of a site plan or road layout is shown. It features contour lines with elevations such as 246, 247, 248, 249, and 250. A ruler is placed at the top right, and a compass is at the bottom right. The drawing includes labels like 'EMERGENCY OVERFLOW STRUCTURE @ EL. 248', 'RIP-RAP', and 'CONTROL FENCE'.

# Hospitals

Charu Infra Engineering Consultants has provided civil and electrical engineering services for various types of hospitals for both government and private clients. We have experience in design of these important structures which require applying specific provisions for special considerations like X-Ray rooms, abnormal soil conditions, etc.
